Our technical support personnel are always happy to assist you in trying to resolve any difficulty you are having with your service.

Agreement

The billing cycle will begin as soon as that customer administratively is entered into the server. To disconnect our service, you will need to notify our office as soon as possible. This service is prorated, so when you connect and disconnect in the beginning, middle or at the end of a month you will only be billed for the days used.

You must have parental permission if under the age of 18.

The undersigned appoints NDTC as agent to order and make changes in service associated with the activation of Broadband Internet services specified above.

I agree to follow the rules of any connected networks if and when using NDTC's broadband internet service. I recognize that NDTC offers no guarantees or warranties on the performance of its network and broadband internet connection, nor on the performance of its members' gateway connections to other networks.

I agree to hold NDTC, their officers, directors, agents and any of the members harmless from any liability arising from special, indirect, or consequential damages, including but not limited to lost profits, loss of opportunity, or any other loss which may result from the use of, misuse of, or lack of availability of NDTC or their facilities.

User Responsibilities & Acceptable Use Policy

Users are personally responsible for all use of the broadband internet service under their login account, even if someone else used their service. Illegal, fraudulent, or abusive use of the service will result in immediate service termination and may be referred to law enforcement authorities.

You must immediately inform NDTC if you suspect any breach of security, such as loss, theft, or unauthorized disclosure or use of your broadband internet service. Until NDTC is notified of a breach of security, by notice given as such, the user will remain responsible for any unauthorized use of the service occurring under their account.

A customer may not sell, assign, transfer, or give away broadband internet service under their account. Under no circumstances will NDTC allow anyone to resell their broadband internet service.

NDTC broadband internet services may not be used to transmit excessive amounts of traffic as determined by NDTC. Prohibited uses include but are not limited to 1. use of service for high-volume purposes, and 2. Routines that generate excessive amounts of traffic. NDTC broadband internet service is to be used by residential and commercial customers in a way that does not affect the overall traffic on the network. NDTC reserves the right to determine if a customer is utilizing services that are intended as "enterprise" use and would require a specialized broadband and IT need.

NDTC is not responsible in any way for any computer programs or devices intended for use in connection with the broadband internet service if such programs are made available on the service. Most of the programs used on the broadband internet service are third-party programs beyond the control of NDTC.

The account holder will indemnify and hold harmless NDTC against any loss, damage, cost, and expense which NDTC may incur or become liable for by reason of claims or actions for libel, violation of privacy rights, plagiarism, copyright infringement, trademark or trade name infringement, domain name disputes, and claims arising in connection with data

transmitted pursuant to the terms and provisions of this agreement and any claims or suits resulting from the account holder's use of the service, including, without limitation, the expense and cost of defending any and all such claims and actions. The provisions of this paragraph shall survive termination of this agreement.

If NDTC is informed of illegal content or alleged copyright or trademark infringement involving an account, NDTC will attempt to notify the account holder of those allegations and secure a response. NDTC may, in its sole discretion, remove or terminate the account containing, on a temporary or permanent basis, materials which NDTC believes are illegal or may create, constitute, or contribute to copyright or trademark infringements. Account holder expressly waives the right to assert any claims against NDTC for any such removal or termination.

Services provided to the Customer by NDTC may only be used for lawful purposes. Transmission or publication of any information, data or material in violation of any U.S. Federal or state regulation or law is prohibited. This includes, but is not limited to, material protected by copyright, trade secret, or any other statute, threatening material, or obscene material. NDTC reserves the right to remove any and all materials which infringe on copyright work. Such materials will be removed at any time upon receiving a complaint and/or notice of copyright infringement.

Fees and Payments

Each account holder is responsible for paying all fees and charges (plus applicable taxes) associated with the use of the broadband internet service. NDTC reserves the right to change the amount of, or basis for determining, any fee or charge, and to institute new fees or charges, effective upon 30-day notice to the member.

Termination of Membership

Either the account holder or NDTC may terminate the service at any time and without cause. The only recourse of a user with respect to dissatisfaction with any policies, guidelines, or practices, changes in fees, or service content is for the account holder to terminate the service.

NDTC may terminate any individual or suspend access to all or any part of the service without notice for conduct that NDTC believes is a violation of this agreement or any policies or guidelines posted by NDTC on the service or for other conduct that NDTC believes harmful to others.

NDTC is not responsible for notifying anyone other than the account holder of termination. Upon termination of service, any banking, brokerage, or other third-party relationships will no longer be accessible through NDTC broadband internet service. NDTC shall not be held responsible for any consequences due to lack of access.

Using the Service

You are responsible for providing all equipment, devices, and software necessary to receive the service.

Logins and Passwords

Use of the NDTC email service requires both a login and a password. Each account can choose up to two (2) free unique NDTC email logins.

Anyone knowing both your login and password can gain access to your NDTC email (passwords should be kept a secret). When choosing a password, select one that is hard to guess (i.e., your first or last name is not recommended). If you forget your password, please contact us so that we can reset it.

Digital Millennium Copyright Act

The Digital Millennium Copyright Act provides limitation for service provider liability relating to copyright material online. NDTC is a service provider in that it provides online services or network access between or among points specified by a user. NDTC does not modify the content that is sent or received.

According to its Terms, Conditions and Acceptable Use Policy, NDTC requires users “to obtain and provide all required permissions if You use the Service to receive, send, display, distribute or execute works protected by intellectual property laws including copyright and patent laws.” Failure to abide by the Terms, Conditions and Acceptable Use Policy may result in suspension of service or permanent disconnection. Network Management Policy

North Dakota Telephone Company or “NDTC” provides this Policy in order to disclose its network management practices in accordance with the FCC’s Open Internet Rules. Information about NDTC’s other policies and practices concerning broadband are available at gondtc.com (“NDTC’s Website”).

NDTC manages its network to ensure that all of its customers experience a fast, reliable, and affordable broadband internet service. NDTC wants its customers to indulge in all that the Internet has to offer, whether it is social networking, streaming videos and music, or communicating through email and videoconferencing.

NDTC manages its network for a number of reasons, including optimization, as well as congestion- and security-protocol-management. NDTC’s customers generally will not be impacted by the protocols and practices that NDTC uses to manage its network.

NDTC’s Network Management Practices

NDTC uses various tools and industry-standard techniques to manage its network and deliver fast, secure and reliable broadband internet service. Such management tools and practices include the following:

I. Managing Congestion

NDTC monitors the connections on its network in the aggregate to determine the rate of utilization. If congestion emerges on the network, NDTC will engage in the re-routing of Internet traffic to relieve congestion. In order to reduce instances of congestion, NDTC adds capacity to its network when utilization has reached a level of at least

80%. On our core and access networks, NDTC may increase capacity by adding FTTH nodes, transport, Internet aggregation routers, and bandwidth, as needed.

On NDTC's network, all customers have access to all legal services, applications, and content online and, in the event of congestion, most Internet activities will be unaffected. Some customers, however, may experience longer download or upload times, or slower surf speeds on the web if instances of congestion do occur on NDTC's network.

Customers using conduct that abuses or threatens the NDTC network or which violates the company's Acceptable Use Policy, Broadband Internet Service Terms and Conditions, or the Broadband Internet Service Agreement will be asked to stop any such use immediately. A failure to respond or to cease any such conduct could result in service suspension or termination.

NDTC's network and congestion management practices are 'application-agnostic', based on current network conditions, and are not implemented on the basis of customers' online activities, protocols, or applications. NDTC's network management practices do not relate to any particular customer's aggregate monthly data usage.

II. Network Security

NDTC knows the importance of securing its network and customers from network threats and annoyances. The company promotes the security of its network and patrons by providing resources to its customers for identifying and reporting such threats as spam, viruses, firewall issues, and phishing schemes. NDTC also deploys spam filters in order to divert spam from an online customer's email inbox into a quarantine file while allowing the customer to control which emails are identified as spam. Customers may access the spam files through the email. Spam files are automatically deleted if not accessed within 30 days. If there are no active logins on an email account for 120 days, no new messages will be processed.

As its normal practice, NDTC does not block any protocols, content, or traffic for purposes of network management, except that the company may block or limit such traffic as spam, viruses, malware, or denial of service attacks to protect network integrity and the security of our customers. NDTC also has a port filtering policy aimed at reducing the spread of computer-related viruses and protecting your computer from intruder access.

III. Device Attachment Rules/Application Specific Behaviors

Except as may be provided elsewhere herein, NDTC does not currently engage in any application-specific behaviors nor does it employ device attachment rules for its network. Customers may use any lawful applications or devices with NDTC.

IV. Monitoring Schedule

NDTC checks its usage logs on a daily basis to determine utilization on its network. When utilization reaches 80%, NDTC adds capacity or reroutes traffic to relieve congestion. NDTC also checks for abnormal traffic flows, network security breaches, malware, loss, and damage to the network. If a breach is detected or high-volume users are brought to light by complaint, NDTC provides notification to the customer via email or phone. If a violation of NDTC's policies has occurred and such violation is not remedied, NDTC will suspend or terminate that customer's service.

V. Network Management Technology

NDTC employs a variety of industry-standard tools, applications, and devices to monitor, secure, and maintain its network, including the following:

- network graphing solutions;
- latency measurement software;
- bandwidth and performance-measurement platforms; and

- Rapid Problem Identification (RPI) technologies monitoring endpoint to endpoint interactions
- DDos – Distributed Denial of Service Protection Services

VI. Service Descriptions

NDTC offers broadband service over FTTH facilities. The following is a list of NDTC's service tiers*:

Tier	Down	Up
DATA Only FiberZone 2	250 Mbps	250 Mbps
DATA Only FiberZone 3	500 Mbps	500 Mbps

DATA Only FiberZone 6	10 GIG	10 GIG
Voice and Data FiberZone 1	25 Mbps	25 Mbps
Voice and Data FiberZone 2	250 Mbps	250 Mbps
Voice and Data FiberZone 3	500 Mbps	500 Mbps
Voice and Data FiberZone 4	1 GIG	1 GIG
Voice and Data FiberZone 5	2.5 GIG	2.5 GIG
Voice and Data FiberZone 6	10 GIG	10 GIG

**Speeds may be limited by location and are listed as up to.*

NDTC also offers ETS service on an individual-case basis.

VII. Network Performance

NDTC makes every effort to support advertised speeds, and will dispatch repair technicians to customer sites to perform speed tests as needed to troubleshoot and resolve speed and application performance problems caused by NDTC's network. NDTC measures availability, latency, and aggregate utilization on the network and strives to meet internal service level targets. However, customer's service performance may also be affected by one or more of the following: (1) the particular websites being accessed; (2) capacity in the public Internet beyond NDTC's network; (3) customer's computer and equipment (including wireless router); and (4) inside wiring at customer's premises.

NDTC tests each service when installed to demonstrate that the service is capable of supporting the advertised speed. Customers can also test their actual speeds using the speed test found on the company website.

VIII. Specialized Services

NDTC provides Voice and Internet-Protocol-Television (IPTV) services to end users. These services, also known as Specialized Services, are separated from the company's best effort broadband internet services on the network. NDTC uses separate layer 2 Q-in-Q VLAN tags in the access network. Layer 2 P-bits and Layer 3 DSCP markings are used to prioritize Specialized Services traffic over best effort broadband internet traffic for the purpose of congestion management. Since Specialized Services traffic is separated from best effort broadband internet traffic, our broadband customers will experience no impact on broadband services resulting from Specialized Services traffic.

IX. Commercial Terms

In addition to this Network Management Policy, patrons may also find links to the following on the NDTC Website:

- Acceptable Use Policy
- Broadband Internet Service Agreement

- Broadband Service Offerings and Rates
- Privacy Policy

For questions, complaints, or requests for additional information, please contact NDTC.

X. Testing

NDTC is required by the FCC to test a random set of customers for speed and latency periodically during the year. NDTC reports the results of this testing to the FCC. This result applies to both upload and download data rates and applies for measurements made both at peak times and over a 24-hour period. By using this service, the customer agrees to allow NDTC to perform these tests.

All such information is handled securely within NDTC and is not disclosed to unauthorized third parties.
